Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 11-21, drawn to a **surface metrology device** comprising a metrology unit and a first image camera and a second image camera, classified in class 356, subclass 601.
 - II. Claims 2-4 and 6-9, drawn to a **semiconductor processing device** comprising a wafer process station and a metrology station comprises an ultraviolet light source for illuminating a measurement region of a surface and at least one spectrograph optically coupled to the measurement region of the surface, classified in class 438, subclass 15.
 - III. Claims 5 and 10, drawn to a **surface reflectometer** comprising a light source, an objective optic adapted to translate relative to a wafer surface and at least one light detector, classified in class 356, subclass 445.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. The inventions I, II and II are distinguished by their mutual exclusive details as set out above and relate to separate areas of inventive efforts. Further, the three inventions are distinguished also by noncoextensive searches. Thus, they have different modes of operations, different function and different effects.

Art Unit: 2877

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III and the search required for Group II is not required for Group I and III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Applicant is noted that claim 10 is dependent on claim 5 (surface reflectometer) and is put in Group III, however, claim 10 is relative to a surface metrology device, thus is not clear which claims claim 10 is dependent on.

Applicant is required to clarify this matter in the next response.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa Q. Pham whose telephone number is (703) 308-4808. The examiner can normally be reached on 6:30 AM to 5 PM, Monday through Thursday.
